DERIVED_DWELLING_ID Variable

DERIVED_DWELLING_ID

Definition: The derived dwelling id was generated by sorting all the individuals within an extract by the CCRIUID and then assigning a sequential number. Each unique dwelling ID got a derived ID. This was added to give a sequential number that was consistent by CCRIUID location throughout the extract.

Source: DWELLING_ID

Codes: None.

Remarks: Derived variables were added for the extract to provide added clarity and consistency throughout the extract.

DWELLING_ID

Definition: This number identifies a dwelling or sample point within a census year and university centre.

Source: System generated during Sample Point selection.

Codes: None

Remarks: This was the third of the basic keys used to identify individuals in the CCRI Database.
