DERIVED_WEEKS_STRIKE

DEFINITION: Weeks amounts in the CCRI database were split between two columns, the Amount and the Unit. In order to harmonize these two variables this particular column was generated. The Not at work weeks variable amount was multiplied or divided based on the expected unit (Weeks) and the corresponding calendar unit. For instance 4 months would be multiplied by 4 to get 16 weeks.

F. Statistical unit	The person.
G. Targeted Population	Each person ten years of age or more reported as gainfully employed (in Column 28) and as a worker or employee (in Column 30).
H. Enumerators' Instructions	<p>175. The purpose of the inquiries under this heading in Columns 32 to 40 is to elicit information on the problem of the economic insecurity of the worker and to ascertain as far as possible the causes which make for unemployment. The value of the information entered on the schedule under this heading will depend entirely upon the care exercised by the enumerator in prosecuting the inquiries. If he does his duty conscientiously and well, very valuable information, which will form the basis for a comprehensive study of the various causes alleged as the reasons for periods of unemployment, will be obtained through the census. The enumerator should carefully study the Specimen Schedule and these Instructions. If, when he starts the work of enumeration, he finds there is any question upon which he is not clear or has any doubt he should communicate immediately with his Commissioner.</p> <p>182. Column 38: Strike or Lockout. The number of weeks this person was idle in the last year because the plant was closed owing to disagreement of the management with employees or because of refusal of workers to continue under current working conditions will be entered in Column 38.</p>
